**DETAILED ACTION*****Double Patenting***

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

1. Claims 1-21 are rejected under the judicially created doctrine of obviousness-

type double patenting as being unpatentable over claims 1-12 of U.S. Patent No.

6,563,370 B2. Although the conflicting claims are not identical, they are not patentably

distinct from each other because both the sets of claims are drawn to the band-gap

voltage reference circuit. Including a pair of transistor (first and second transistor), a first

resistor network connected to first transistor, a second resistor network connected to

second transistor, an amplifier means, a ratio of current density changes as a function

of temperature, first resistor network comprises at least two resistor in series with

collector, resistor network comprises high and low temperature coefficient, temperature

dependent current ratio, the output circuit includes an operational amplifier and resistor connected in parallel.
